

VAUGHN JOSHUA B. BARIT

FULL STACK DEVELOPER

Pasay City, Philippines | dev.vaughnjoshua@gmail.com | github.com/vaughn-joshua

EXPERIENCE

EasyCom Japan Philippines Inc.

Feb 2026 – Jun 2026

(Full Stack Mobile Developer Intern | 486 hrs)

TypeScript | Node.js | Express | TSOA | Prisma | TiDB Cloud | React Native | Expo | Zod | JWT | Socket.io | Google Cloud Storage | pdfkit | ESLint

- Owned the Government Benefits module (SSS, PhilHealth, Pag-IBIG, BIR Tax) end-to-end — Prisma schema, TSOA backend services, and Expo React Native screens.
- Engineered a 740-line PDF parsing service that extracted structured contribution and tax-bracket data from non-columnar government rate-table PDFs (BIR TRAIN Law, SSS, PhilHealth), eliminating manual data entry.
- Built a schema-driven dynamic form system in React Native with auto-prefill for edit flows, payslip PDF generation, and a Multer + Google Cloud Storage file upload pipeline.

PROJECTS

TravelEase: A Portal for Travel Planning and Tourism Promotion in Tagaytay (Capstone Project) 2024 – 2025

PostgreSQL | Supabase | React | Tailwind | Node.js | Express.js | Google Cloud Platform

- Web-based, featuring collaborative itineraries, interactive maps, business listings, and user-generated reviews to enhance tourist decision-making and promote local destinations.
- Contribution:** Project Manager & Lead Developer; system planning, database and workflow design, core feature implementation, testing, and project defense.
- Key Tools:** React Leaflet, OpenStreetMap, Nominatim API, Maps JavaScript API, Geocoding API, Directions API, Places API, Supabase Storage, Vercel, Railway

Hireva — Job Application Tracker Mobile App (Solo Project)

2025 – 2026

TypeScript · Node.js · Express · Prisma · PostgreSQL · React Native · Expo · Zustand · JWT · Docker · EAS

- Built a full-stack mobile job-search CRM solo — REST API with JWT access/refresh token auth, a 7-model PostgreSQL schema, and a React Native Expo app with file-based routing, device calendar integration, and local push notifications.
- Implemented a token-refresh interceptor with request queuing — on a 401, a single refresh runs while concurrent requests queue and replay against the new token, preventing refresh stampedes.
- Shipped to production with a multi-stage Docker build, migrate-on-deploy, and OTA update channels via EAS.

Andy's Order & Menu System

2023

Express.js | Vanilla JavaScript | HTML | CSS | Bootstrap | Google Cloud Platform

- A two-module web system for a local food business, enabling customers to view the menu and place orders, and business owners to track and manage orders efficiently.
- Contribution:** Project Manager and lead developer; planned system modules and workflows, designed database structure in Google Sheets.
- Key Tools:** Google Sheets Database (relational structure with multiple tables), Google Sheets API

SKILLS

Languages: TypeScript · JavaScript · Java · C · C++

Databases: PostgreSQL · MySQL · TiDB Cloud

Frontend & Mobile: React · React Native · Expo · HTML · CSS · Bootstrap · Tailwind

Backend: Node.js · Express.js · TSOA · Prisma · REST API Design · JWT Authentication

Tools & Platforms: Git · Docker · Google Cloud Platform · Google Cloud Storage · EAS · Figma · Swagger

Information System Skills: Basic System Analysis & Design

EDUCATION & ACADEMIC AWARDS

Bachelor of Science in Information Systems

2022 – 2026

Technological University of the Philippines–Manila

- Department of Science and Technology (DOST), JLSS RA 7687 Scholar** (2024 – 2026)
- Consistent Dean's Lister** – First Year, First Semester to Fourth Year, maintaining a GPA of 1.75 and above.
- Technolympics 2024 Champion — Tech Guild, TUP–Manila
